

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. Medical Superintendent,

VALENTINE S. BENSON.

Assistant Physician,

THOMAS BURGESS, JR.

Treasurer,

JAMES D. BAKER.

Clerk,

WILLIAM A. CAMPBELL.

Supervisor,

FRANK J. EVERSMAN.

REPORT OF THE TRUSTEES.

To the HON. JOHN P. ALTGELD, Governor of Illinois:

The Trustees of the Illinois Asylum for Insane Criminals respectfully submit their second biennial report of said Institution, for the two years ending June 30, A. D. 1894.

The present Board of Trustees took charge of this Institution February 1, A. D. 1893.

We deem it advisable to state the condition in which we found the Institution at that time. The building is situated on the side of a hill near the bank of the Mississippi river, at an elevation of about two hundred feet above low water mark of that stream.

The building at that time was not finished; the walls were plastered with a rough, sand finish; the entire building was heated with soft coal stoves, by which it was impossible to properly heat the building, and the smoke and dirt from which had caused the walls to become almost black; the sewerage was imperfect, and on account of the peculiar location of the building the water from the side of the hill was drained into the basement; the only means of lighting the building was by coal oil lamps, which were both inadequate and dangerous for an institution of this character; the water supply was so meager and insufficient that the Institution was practically without water, and the building in other respects was out of repair.

To correct these deficiencies the General Assembly, at its last session, made the following special appropriations, viz:

For furniture and repairs.....	\$5,000 00
For heating.....	3,500 00
For plumbing, sewerage and excavating.....	4,300 00
For electric lights.....	2,500 00
For water.....	1,500 00

Out of the appropriation for furniture and repairs, we have expended \$1,350.10, and \$999.41 of the general appropriation for repairs, with which the building has been painted, the walls papered, the roof repaired and painted, a slaughter house built, a poultry house built, and the Institution supplied with suitable furniture.

With the appropriation for heating, we have supplied the Institution with a good and sufficient steam heating plant.

Of the appropriation for plumbing, sewerage and excavating, we have expended \$4,297.17, with which we have built a good sewerage system, and excavated from around the building, thereby preventing the water from flowing into the basement, and supplied the building with all necessary plumbing.

Of the appropriation for lighting said building, we have expended \$1,306.63, with which we have supplied the Institution with a good electric light plant, and all necessary lamps and fixtures, except the dynamo and motor power, which we have not purchased for the reason that we have been able to make satisfactory arrangements with the Southern Illinois Penitentiary, by which they furnish us with the necessary electricity.

Of the appropriation for supplying said building with water, we have expended \$825.19. By an agreement entered into with the Southern Illinois Penitentiary, we receive water from its water tower, to which we have laid a four-inch cast-iron pipe. The building is now supplied with an abundance of hot and cold water.

On the 30th of June, 1894, to which time this report and the above expenditures extend, the water works were not entirely completed and has required an additional expenditure of money.

With the improvements made, the general appearance of the building has been entirely changed, the walls are neat and clean, the entire building comfortably heated and lighted, and the sanitary condition wonderfully improved.

Of the other special appropriations made, viz.: For surgical instruments, \$300.00; for library, per annum, \$250.00; for road, \$300.00. We have expended of the appropriation for surgical instruments, \$53.35. Of the appropriation for library, we have expended \$250.00. The appropriation for road we have not yet used.

In the purchase of all the above material, and for making all of the said improvements and repairs, bids have been received and contracts let to the lowest bidder in accordance with your instructions. The appropriation made for the ordinary expenses of this Institution from June 30, 1892, to June 30, 1893, was \$25,000.00, and from June 30, 1893, to June 30, 1894, was \$30,000.00; total, \$55,000.00.

There was expended of the ordinary from June 30, 1892, to June 30, 1893, \$30,257.18, and for the year from June 30, 1893, to June 30, 1894, \$25,709.99. It will be observed from the above statement that there was expended during the year ending June 30, 1893, \$5,257.18 in excess of the appropriation for that year, for which we are not responsible, for the reason that of the quarterly allowance of \$6,250.00 for that quarter ending March 31, 1893, there was expended February 1, 1893, when we took charge of the Institution, \$5,610.64. It will also be observed that the ordinary expenses for the year ending June 30, 1894, is \$4,290.01 less than the appropriation made for that year.

While we have made no effort to economize at the expense of the health or comfort of the patients, we desire to call your attention to the fact that the cost per capita to the State for the year ending June 30, 1893, was \$261.44, while for the year ending June 30, 1894, it was only \$213.63.

For a more particular itemized statement, and complete report, we call attention to the reports of Dr. V. S. Benson, the Medical Superintendent, and J. D. Baker, Treasurer, hereto attached and made a part of our report.

There has been a marked improvement in the condition of the patients of this Institution, their general health has been improved, they have been comfortably clothed, well fed, and properly cared for.

For the economical manner in which the Institution has been managed, credit should be given to Dr. V. S. Benson, the Medical Superintendent, who has faithfully devoted his entire time and attention to the improvements in detail at the Institution, and by his watchful care and business ability has proven himself an efficient public servant, and especially adapted to the position he occupies.

There are some improvements in this Institution, however, that should be made. We heartily indorse what Dr. Benson has said in this report in regard to additional room, and recommend that an appropriation be made for that purpose.

We indorse what Dr. Benson has said in this report with reference to putting in concrete floors, arch and tunnel, but we have a sufficient appropriation on hands to make this improvement.

We recommend that the following additional appropriations be made by the Thirty-Ninth General Assembly for this Institution.

For furniture and repairs on building and grounds, per annum.....	\$2,000 00
For the library, per annum.....	250 00
For maintaining the electric light plant, per annum.....	600 00
For maintaining the water supply, per annum.....	500 00

We believe that we have reduced the expense per capita for maintaining the patients of this Institution as low as it practically can be, to do justice to the inmates; we therefore recommend an appropriation for defraying the ordinary expenses of an amount of not less than two hundred and fourteen dollars (\$214.00) per capita, per annum, and if the additional building we have herein recommended be erected, we estimate that the average number of patients for the next ensuing two years will be two hundred.

Respectfully submitted,

WILLIAM V. CHOISSE,
JOHN J. SCHNEIDER,
EDWARD C. KRAMER,
Trustees.

SUPERINTENDENT'S REPORT.

To the Trustees :

GENTLEMEN:—In accordance with a provision of the law, I herewith present the second biennial report of the Illinois Asylum for Insane Criminals for the two years beginning July 1, 1892, and ending June 30, 1894. The most important occurrences during the period embraced in this report have been the construction of new steam heating plant, the construction of new sewerage, putting in electric lights to supplant coal oil lamps, and supplying the Institution with an abundance of water, of all of which you will find a detailed description.

The table of movement of population, found herein, gives a view of the operations of the Institution in reception and discharge of patients. It shows that the total number treated during the two years was one hundred and ninety-one; that the number discharged, recovered, was forty-four (including those returned to prison); died, twenty-one. The daily average number of patients under treatment was one hundred and twelve (112).

The average cost per capita to State for maintenance, for the year ending June 30, 1893, was two hundred sixty-one and forty-four one hundredths dollars (\$261.44); for the year ending June 30, 1894, the average was two hundred thirteen and sixty-three one hundredths dollars (\$213.63). The average for the two years was two hundred and thirty-seven and fifty-three one hundredths dollars (\$237.53). The last year shows a marked decrease in the average cost of maintenance.

In the matter of cost of maintenance, it is a well-known fact that several hundred patients in one institution can be maintained at a much less cost per capita, than can a small number, and the class of patients confined in this Institution (insane criminals) should be considered—a very few can be safely employed at any kind of work and there is greater incentive to escape on this account. We pay a reward of twenty-five dollar for the capture of an escaped patient, and make it a practice to capture convict patients with slight regard to costs, adding these expenses, which do not occur in other asylums, with the expenses of returning patients who have recovered sanity, to the penitentiaries, which we also pay from ordinary fund for maintenance, very materially increases the cost per capita. Notwithstanding these extra expenses, we have reduced the cost of maintenance to very near an average with other charitable institutions.

When you placed me in charge of this Institution, February 3, 1893, the condition of the building and grounds was deplorable. The surface water drained from all points, save in front of the main entrance, into the basement, and about one-third of the basement was without floor. In that part there was a stagnant pool fed by seepage and the drainage from the hill side. What sewerage had been put in was very defective, being too small, and having very little fall in the direction of outlet, and from washing in of earth was much of it completely filled with dirt, and owing to this unsanitary condition, no doubt, the Institution was visited with an epidemic of dysentery during the summer and fall of 1893, which very materially increased the death rate, as may be seen by reference to report on Vital Statistics, hereunto attached. This condition has been remedied

by putting in new sewer main with sufficient depth and fall, as well as capacity, which is giving good satisfaction. This, together with some judicious grading on the grounds about the building, (not yet completed, but well advanced and being pushed as rapidly as possible with labor of inmates) has materially improved the sanitary condition, but this cannot be rendered perfect until the wings of the building containing the wards are refloored. The present floors are constructed of pine boards laid on joists 2x6 inches, filled closely to under surface of floors with earth. These floors are now so decayed that they are with use in many places breaking through, and will be entirely rotted out in a short time, and as the floor is not close and must be washed frequently, wetting the earth under the floors and keeping them constantly damp, renders the atmosphere in the wards very unwholesome. Under these floors, we excavated a tunnel 4x4 feet to put in the steam mains from which the risers are supplied going to radiators on the wards. The heavy pipes are suspended to the rotten joists under this fast decaying floor, therefore I recommend that we, at once, lay a brick arch in the tunnel in which to suspend the steam pipes, and over all lay cement floors. This work is a positive necessity and must be done, or else our steam pipes and radiators may come down at any time in this part of the building; and while this work is being done, one-half of the inmates will have to be moved from the building and provided for elsewhere, which will very materially increase the ordinary expense for the time consumed in putting in the work, which is a very extensive and necessarily expensive improvement.

During the fiscal year ending June 30, 1894, we have made and completed most of the improvements for which special appropriations were made by the Thirty-eighth General Assembly.

There was appropriated for steam heating, \$3,500.00; plumbing, sewerage and excavating, \$4,300. These sums have been expended by putting in a low pressure system, consisting of a two boiler plant. Boilers 12 flued, 16 feet long, 48 inches diameter, placed in a boiler-house, excavated to a depth of 16 feet; building 22x36 feet, erected with 18-inch brick walls, cement floor, roof on a plane with first floor of main buildings, to be supplied with steam heat. Also hot water boiler, 12 feet long, 40 inches diameter, with all necessary water connections, steam pipes and radiators, with the entire system drained back to boilers. So complete is its action that with three pounds of steam, shown by gauge, we were able to maintain a temperature of 70° throughout the entire building the coldest weather we had last winter, about 5° below zero.

We have also put in new sewer main at a depth of 18 feet from surface of first floor of main building, with all connections new and changed to meet the requirements, rendering, as before stated, very satisfactory service.

For electric lighting, there was the sum of \$2,500.00 appropriated. This work is also done. We have in the three-wire Edison system, with all necessary electric fixtures, openings and lamps, with a wire main constructed of "0000" solid copper wire a distance of one-fourth mile to battery and dynamo of Southern Illinois Penitentiary, from which we take power, paying them \$400.00 per annum for the same.

We have also expended the annual appropriation of \$250.00 for the fiscal year ending June 30, 1894, for library, in the purchase of standard medical works, together with some miscellaneous prints and periodical literature, the last two mentioned being for the use of the patients.

There was also appropriated the sum of \$1,000, per annum, for repairs. Of this sum we have expended nearly the entire fund for the fiscal year ending June 30, 1894, as the entire building was in an unfinished condition, and much of the work that had been done was very defective. For instance, the roof is constructed of tin shingles. They had been nailed on. The ridges and hips of the roof had not been soldered, neither had the flushing from the gutters against the walls, and in other angles of the

roof been soldered or in any way fastened, and the water came in freely. This has been repaired by properly soldering, and two heavy coats of mineral paint and oil applied. We now have no leaks.

We have painted the inside of all the wards, both wood and iron work. Have painted the center floors, doors, windows and casings all complete, from first to third floor. Have papered the entire center, except patients' dining-room; all the walls being rough, sand plaster, and black with coal smoke and dust, had to be lined or covered before hanging the paper. Many other repairs, too numerous to mention in detail, have been made. We have also constructed a neat and convenient slaughter-house and poultry-house, of which we were very much in need.

There was appropriated \$1,500.00 for supplying the Asylum with water. By an agreement with the Southern Illinois Penitentiary, we receive water from its water tower, to which we have laid a four-inch cast-iron pipe, a distance of 2,200 feet from, and an elevation of 70 feet above, the Asylum, which gives us good pressure. We have put in five hydrants, or fire plugs, conveniently located on asylum grounds, and made connections for water supply to all parts of the asylum, the horse barn, cow-shed and pig-sties. We have yet to purchase some fire hose, which will about complete the outlay. By agreement we pay the Southern Illinois Penitentiary a water rate only sufficient to cover actual proportional expense for pumping amount used by this Institution. As in case of supplying motor power for electric lighting, it will be much cheaper to the State than the maintenance of independent plants.

The appropriation of \$300.00 for building road has not been used, badly as the road is needed. We have not yet been able to construct it, owing to other more pressing improvements.

In the farm statement hereto submitted, you will notice that we only report from January 1, 1893, to Dec. 31, 1893, it being impracticable to report expenditures and income in that line for the fiscal year ending June 30, therefore we make no report for the agricultural year ending Dec. 31, 1894. The season for which we make report was dry and unfavorable for crops, especially vegetables, yet it will be seen, by reference to statement attached, that after paying all charges in that department, including rent of land, both for cultivation and pasture, we have a net balance in our favor of \$144.09. By this work we have added largely to the dietary, supplying fresh vegetables of all kinds in their season, adding needed supplies and comforts to the inmates, and created a small net income for the State.

For report of expenditures of the various funds intrusted to our care, and use of the Institution, I refer you to financial statement hereto attached, which will show itemized receipt and disbursement of funds coming to the Institution from any and all sources.

The health of the inmates is exceedingly good, if we consider the crowded condition of the Institution at this time, Sept. 1. We have 128 patients, the full capacity of the Institution being 125; therefore we have some patients sleeping on the floor, there being no room in the dormitories to place additional beds. The dining room is also over-crowded, and no room to seat all the patients at the same time. Our kitchen is located in the basement; the ceilings are very low, very poorly ventilated and so dark that we are compelled to supply light from lamps during the day.

Our store room is in the center adjoining the office, is too small for that purpose and very much needed for library and reception room, having no room now for that purpose.

In this connection, I urge the necessity of erecting an addition to center of main building in an ell shape, for which we require no basement. According to our plan, it will give us a store room of sufficient dimensions, a kitchen with light and ventilation, a laundry and drying room on first floor, and inclose a court with brick walls for exercise and airing of patients, where we now have an unsightly plank stockade. The creation

of this court will cost no additional money, following the plan I submit. On the second floor we will get two additional bedrooms in the space now occupied by the dining-room for the help. We will also get the present patients' dining-room for chapel and other public purposes, which is very much needed, we having at present to remove all dining-room fixtures each Sunday to occupy for chapel. We will get in the addition on second floor, attendants' dining-room and elevator from kitchen below, and patients' dining-room, 30x78 feet, and on the third floor, two additional bedrooms for female help, which are badly needed, and cellrooms for twenty-six additional patients. This addition will also very materially add to the appearance of the institution.

In supplying steam heating, electric lighting and sewerage, we have only to make connections with present plant, so there will be no additional cost for these purposes, except what plumbing, steam pipes, radiators and electric wiring and fixtures are necessary in the new building. This addition is a necessity, there being a constantly increasing demand for the accommodation of the class of patients kept here.

The year just closed has been a very busy one in every respect. It was the first complete year of my administration, and there was much activity and work in all directions, owing to the unfinished condition of the building and its appointments.

In conclusion, I wish to thank you for your assistance and for the encouragement given me by your expressed approval of the work accomplished here.

Respectfully submitted,

V. S. BENSON,

Medical Superintendent.
